GEHMAN
DESIGN REMODELING

Established in 1990, Gehman Design Remodeling (GDR) is a Pennsylvania-based design and remodeling firm. As a family-run company, its skilled and knowledgeable team work seamlessly to help clients bring their dream projects to life. The company truly cares about its projects and for those who reside in the houses they work on, which is why its design team ask a vast array of questions throughout the process to ensure they fully understand exactly what it is the client wants. GDR has its own kitchen and bath showroom which clients can view to find inspiration, an impressive building which used to be a 19th century bank barn. Now an ultra-modern space, GDR has its own kitchen and bath showroom, a master-bathroom, and a media room, plus tonnes of samples for cabinets, countertops, and tiles.

GDRs remodeling process is thorough, and takes homeowners step-by-step through each key stage to the stunning end result. It starts with a face-to-face consultation at their home to see if the working relationship is a good fit, and explore how GDR can bring this project to life, discussing budgets and costings, and using the showroom samples if required. Once an agreement is in place, no tools are picked up until a 3D modelling software is used to provide an accurate representation of the finished result. This state-of-the-art technology allows clients to effectively walk through their remodelled home before the work has even begun. GDR offers an exceptional five-year labour warranty, and 10-year structure warranty, so clients are fully protected.

The judging panel was particularly impressed by the company's talented workforce. Gehman Design Remodeling actively encourages everyone, from designers to craftsmen and women to stay on top of the latest industry trends, and many of them hold NARI (National Association of the Remodeling Industry) certifications. Its remodeling consultants lead a team of focused professionals for each individual project, pouring all their expertise into that remodel to achieve the desired result. Online testimonials often refer to the team's high-level of professionalism, consistent communication, organisation, and knowledge, meaning they can help steer remodeling ideas into new and creative directions.
